

# City of Ithaca NY

## 2010 Census Neighborhood Statistics Program SF1 Release

# Introduction

The data in this book originates in the Census Bureau's Summary File 1 release of 2011. The data is aggregated into neighborhood totals from the block and block group level counts for the City of Ithaca geographic area – see 2010 Neighborhoods Map.

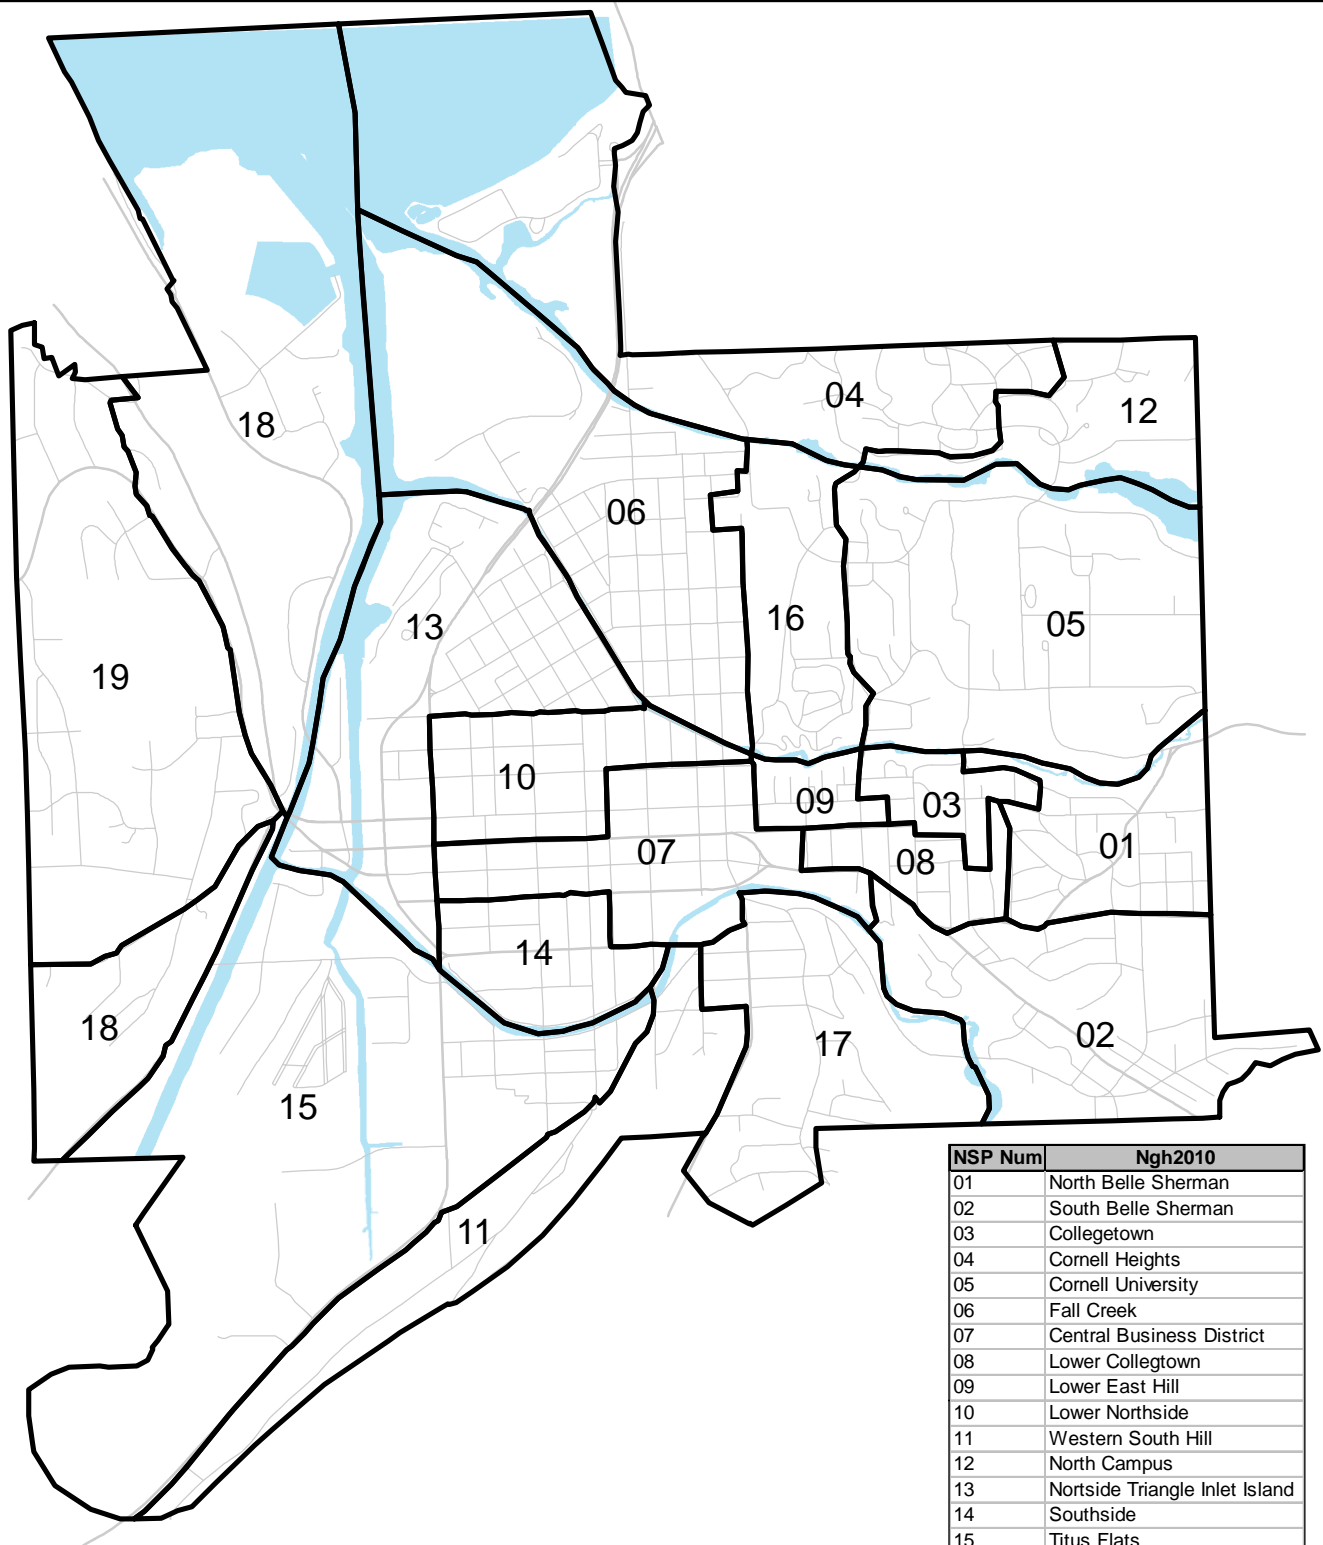

The intended use of this compilation is the comparison of characteristics of City neighborhoods with each other and over time. Please note that the neighborhood boundaries for 2010 are changed for Collegetown and Lower Collegetown neighborhood. Therefore the Collegetown and Lower Collegetown data cannot be used for direct comparison with 2000 or earlier Census data. See 2010-2000 Neighborhood Map-Comparison.

In comparing with the 2000 neighborhood statistics book, you will also see that there are many characteristics that cannot be found in the 2010. The Census Bureau no longer collects these social and economic characteristics as part of the decennial census. To enrich the view of City neighborhoods provided in this book, we have added some characteristics that were available in this data but not included in the 1980, 1990 and 2000 books. In addition, we will prepare a second book to provide a view of City neighborhoods based on tract level data from the American Community Survey, which is how the census Bureau now collects detailed housing, social and economic characteristics.

A description of the source tables, fields, collections methods and other important information about SF1 release can be found in the publication <http://www.census.gov/prod/cen2010/doc/sf1>. For additional Census data as well as other formats including tables and maps, consult the American Fact Finder at <http://factfinder2.census.gov/faces/nav/jsf/pages/index.xhtml>.

If you have further questions about this compilation of Census data, after consulting the Census website, please contact the GIS team at 607 272-1717 or [gisrequest@cityofithaca.org](mailto:gisrequest@cityofithaca.org). A copy of the data in spreadsheet or GIS form is also available through the GIS Program.
