Ithaca Police Department
120 East Clinton Street
Ithaca, New York 14850

General Order Number: 332
Administration and Maintenance of Intranasal Naloxone

Issuing Authority: Chief John Barber
Effective Date: May 11, 2015

Rescinds/Supersedes: All previously issued directives
Review Date: May 2016

Applicable NYSLEA Standards: 33.1;33.2;33.3
Number of Pages: 7

I. Purpose

The purpose of this policy is to establish guidelines and regulations governing the utilization of naloxone by trained personnel within the Ithaca Police Department. The objective is to treat and reduce injuries and fatalities due to opioid-involved overdoses when the Ithaca Police Department Officers are the first to arrive at the scene of a suspected overdose.

II. Policy

Ithaca Police Department personnel may possess and administer naloxone so long as they have been trained consistent with New York State Public Health Law §3309 and the regulations in §80.138 of Title 10 of the New York Codes, Rules and Regulations. The New York State Division of Criminal Justice Services and the New York State Department of Health training curriculum meet this standard. New York State Public Health Law §3309 provides protection for non-medical individuals from liability when administering naloxone to reverse an opioid overdose.

III. Definitions:

A. Opioid: A medication or drug that is derived from the opium poppy or that mimics the effect of an opiate. Opiate drugs are narcotic sedatives that depress activity of the central nervous system; these will reduce pain, induce sleep, and in overdose, will cause people to stop breathing. First responders often encounter opiates in the form of morphine, methadone, codeine, heroin, fentanyl, oxycodone (OxyContin® and Percocet®), and hydrocodone (Vicodin®).
B. Naloxone: A prescription medication that can be used to reverse the effects of an opiate overdose. Specifically, it displaces opioids from the receptors in the brain that control the central nervous system and respiratory system. It is marketed under various trademarks, including Narcan®.

C. Overdose Rescue Kit: At minimum should include the following:

1. Two (2) prefilled luer-lock syringes, without needles, each containing 2mg of naloxone in 2ml of solution, and within their manufacturer assigned expiration dates.

2. Two (2) mucosal atomizer device (MAD) tips, compatible with standard luer-lock syringes.

IV. Procedures

A. Naloxone Use:

1. Officers will request an ambulance to respond to the scene where the aided is in a potential overdose state.

2. Officers should use universal precautions and protections from blood borne pathogens and communicable diseases when administering naloxone.

3. Officers will determine need for treatment with naloxone by evaluating the aided: if the aided is unresponsive with decreased or absent respirations, the officers should administer naloxone following the established training guidelines.

4. Once the assessment of the aided is complete; which should include, but may not be limited to, determining unresponsiveness and other indicators of opioid involved overdose, each officer will administer the medication from the Overdose Rescue Kit following the established training guidelines.

5. Officers will use proper tactics when administering naloxone; aided individuals who are revived from an opioid overdose may regain consciousness in an agitated and combative state and may exhibit symptoms associated with withdrawal.

6. Officers will remain with the aided until EMS personnel arrive.

7. Officers will inform EMS personnel, upon their arrival, that naloxone has been administered.
8. Officers will notify their supervisor of the use of naloxone and document the use as described in section C of this policy.

B. Maintenance/Replacement of Naloxone:

1. Overdose Rescue Kits will be assigned to each officer with proper storage guidelines for temperature and sunlight exposure.

2. Used, lost, damaged, or expired Overdose Rescue Kits will be replaced by the department, utilizing medical supply vendors.

3. Expired naloxone will be:
   a) Maintain by the agency for use in training; or
   b) Properly disposed of in accordance with the department’s policy for disposal of prescribed drugs.

C. Documentation

1. Following naloxone administration, the officer shall submit a New York State Public Safety Naloxone Quality Improvement Usage Report (Appendix B). This report will be forwarded to the Records Division and then submitted to the New York State Department of Health.

2. The on-duty supervisor will be responsible for notifying the Training Unit and the Chief’s Office regarding the incident and the use of naloxone.

3. Each quarter, the Training Coordinator will submit an electronic “COP Quarterly Data Submission” to the Attorney General COP Program (Appendix A). This report allows for continued funding of naloxone through the Attorney General.
V. Training

A. The training unit will be responsible for the following:

1. Certifying officers in the use and care of naloxone and maintaining those training records;

2. Managing the supply, integrity and expiration dates of the Overdose Rescue Kits and;

3. Assuring the maintenance of the administration records.

B. Yearly refresher training will include familiarity with the assembly of the Overdose Rescue Kit and the effective administration and maintenance of naloxone.
COP Quarterly Data Submission Page

Please complete the following form to submit quarterly data to the OAG in relation to the naloxone kits that have been purchased through COP funds. Please email any questions or problems to cop.program@ny.gov.

Optional Questions

Under Your Jurisdiction (Regardless of Naloxone Administration) Breakdown Of:

- Prescription opioid-related deaths:
- Heroin-related deaths:
- 911 calls relating to drug overdoses:
- Opioid-related aided cases:

COP Program & Naloxone Feedback:

- Where are you storing the naloxone?
- What problems, if any, have you had with the use/storage of naloxone?
- How are your police officers documenting the use of naloxone?
- What other comments/feedback/advice do you have about the COP program or naloxone?
# New York State Public Safety Naloxone Quality Improvement Usage Report

**Version: 05/23/2014**

## Date of Overdose:
[ ] [ ] [ ] [ ] [ ]

## Arrival Time of Officer:
[ ] [ ] AM  [ ] PM

## Arrival Time of EMS:
[ ] [ ] AM  [ ] PM

### Agency Case #

### Gender of the Person Who Overdosed:
- [ ] Female
- [ ] Male
- [ ] Unknown
- [ ] Age:

### Zip Code Where Overdose Occurred:

### County Where Overdose Occurred:

### Added Status Prior to Administering Naloxone (Check one(s) in each section):
- [ ] Responsive
- [ ] Unresponsive
- [ ] Responsive but Sedated
- [ ] Alert and Responsive
- [ ] Other (specify):
- [ ] Breathing:
  - [ ] Breathing Fast
  - [ ] Breathing Slow
  - [ ] Breathing Normally
  - [ ] Not Breathing

### Pulse:
- [ ] Fast Pulse
- [ ] Slow Pulse
- [ ] No Pulse
- [ ] Did not check pulse

### Added Overdosed on What Drugs? (Check all that apply):
- [ ] Heroin
- [ ] Benzodiazepines
- [ ] Cocaine
- [ ] Opioids (Opiates)
- [ ] Buprenorphine/Suboxone
- [ ] Pain Pills
- [ ] Unknown Pills
- [ ] Unknown Injection
- [ ] Alcohol
- [ ] Methadone
- [ ] Don’t Know
- [ ] Other (specify):

### Administration of Naloxone:
- [ ] Number of vials of naloxone used:

### If naloxone worked, how long did naloxone take to work? (Check one(s) apply):
- [ ] Less than 1 minute
- [ ] 1-3 minutes
- [ ] 4-5 minutes
- [ ] ≥5 minutes
- [ ] Don’t Know

### Added's Response to Naloxone:
- [ ] Combative
- [ ] Responsive and Aggressive
- [ ] Responsive and Alert
- [ ] Responsive but Sedated
- [ ] No Response to Naloxone

### Post-Naloxone Symptoms: (Check all that apply):
- [ ] None
- [ ] Dope Sick (e.g., nauseated, muscle aches, runny nose and/or watery eyes)
- [ ] Respiratory Distress
- [ ] Seizure
- [ ] Vomiting
- [ ] Other (specify):

### What else was done by officer(s) (check all that apply):
- [ ] Yelled
- [ ] Shocked
- [ ] Sternal Rub
- [ ] Recovery Position
- [ ] Bag Valve Mask
- [ ] Mouth to Mask
- [ ] Mouth to Mouth
- [ ] Defibrillator (If checked, indicate status of shock):
  - [ ] Defibrillator - shock administered
  - [ ] Defibrillator - no shock
- [ ] Chest Compressions
- [ ] Oxygen
- [ ] Other (specify):

### Was naloxone administered by anyone else at the scene? (Check all that apply):
- [ ] EMS
- [ ] Bystander
- [ ] Other (specify):

### Disposition (check one):
- [ ] Care transferred to EMS
- [ ] Other (specify):

### Did the person live?:
- [ ] YES
- [ ] NO
- [ ] Do not know

### Hospital Destination:

### Transporting Ambulance:

### Comments:

### Administering Officer’s Information:
- [ ] Agency
- [ ] Shield #
- [ ] Last Name
- [ ] First Name
