American Community Survey (ACS) Data by Tract 2006-2010

Selected Tables

Introduction

The American Community Survey (ACS) is ongoing survey that provides data every year – giving communities the current information they need.

The Census Bureau collects American Community Survey data from a sample of the population in the United States and Puerto Rico – rather than from the whole population. All ACS data are survey estimates.

For 2006-2010, ACS 5-year estimate data was collected between January 1, 2006 and December 31, 2010. Data are combined to produce 60 months of data. This is called 5-year data.

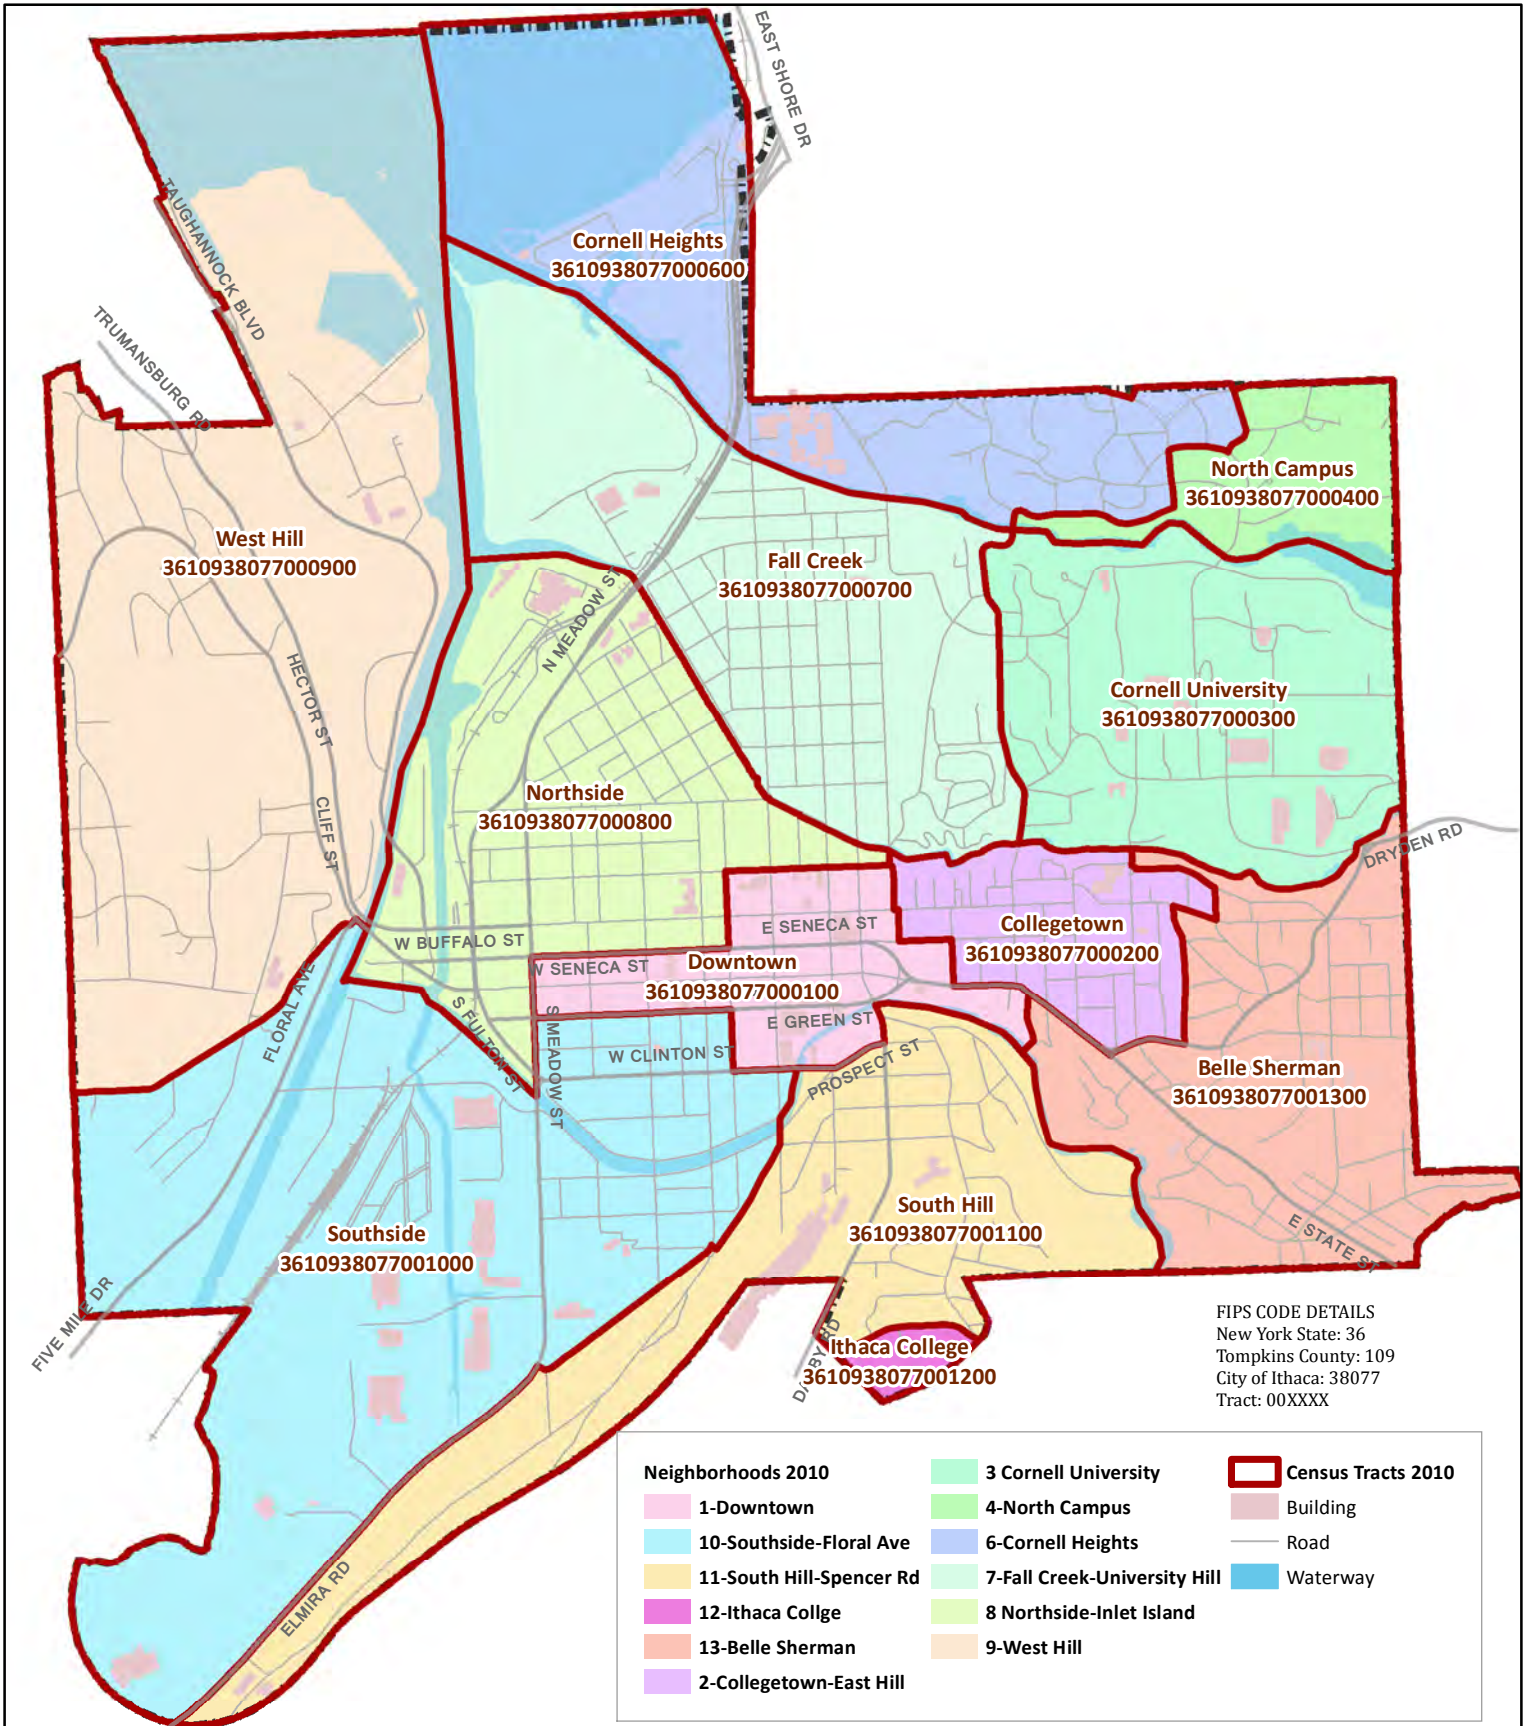

To help you interpret the reliability of the estimate, the Census Bureau publishes a margin of error (MOE) for every ACS estimate. An ‘*****’ entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

The kind of information presented in this booklet are a selection from the whole of the available 5 year ACS data. Data was chosen to be as closely as possible comparable to the data published in the 2000 Neighborhood Statistics Program book. However, the geographic unit used in this data is the Census tract- that is, it is not the same geographic unit as the Neighborhoods of 2000 and 2010 which is based on 1 or more block groups. The method of collection of the data by the Census Bureau is also different. The best use of the data presented here is to compare between tracts and to get a view of the area described by these statistics.

For more information about ACS, including the reliability of the data, please visit page www.census.gov/acs. These and additional ACS tables are published on the Census Bureau’s American FactFinder website factfinder2.census.gov, and are available for download.

If you have further questions about this compilation of ACS data, after consulting the ACS website, please contact the GIS team at (607) 272-1717 or gisrequest@cityofithaca.org. A copy of the data in spreadsheet or GIS form is also available through the GIS Program.
